

FEDERAL FUNDS

The State of California Takes Advantage of Available Federal Grants, but Budget Constraints and Other Issues Keep It From Maximizing This Resource

REPORT NUMBER 2002-123.2, AUGUST 2003

Audit Highlights . . .

Our review of federal grant funding received by California found that:

- California's share of nationwide grant funding, at 11.8 percent, was only slightly below its 12 percent share of the U.S. population.*
- Factors beyond the State's control, such as demographics, explain much of California's relatively low share of 10 large grants.*
- Grant formulas using out-of-date statistics reduced California's award share for another six grants.*
- In a few cases, California policies limit federal funding, but the effect on program participants may outweigh funding considerations.*
- California could increase its federal funding in some cases, but would have to spend more state funds to do so.*

Departments of Finance and Health Services responses as of October 2003

The Joint Legislative Audit Committee (audit committee) requested that the Bureau of State Audits determine whether California is maximizing the amount of federal funds it is entitled to receive for appropriation through the Budget Act. Specifically, we were asked to examine the policies, procedures, and practices state agencies use to identify and apply for federal funds. We also were asked to determine if the State is applying for and receiving the federal program funds for which it is eligible, and to identify programmatic changes to state-administered programs that could result in the receipt of additional federal funds. Finally, the audit committee asked us to examine whether the State is collecting all applicable federal funds or is forgoing or forfeiting federal funds for which it is eligible. Specifically, we found:

Finding #1: California's share of federal grants falls short of its population share, due in part to the State's demographics and federal grant formulas.

California's share of total federal grants awarded during fiscal year 2001-02 was 11.8 percent, or \$42.7 billion. This share is slightly below California's 12 percent share of the nation's population (population share). For 36 of 86 grants accounting for 90 percent of total nationwide federal grant awards in fiscal year 2001-02, California's share was \$5.3 billion less than an allocation based on population share alone. Grants for which California's share falls below its population share include ones in which demographics work against California, and formula grants that provide minimum funding levels to states or use out-of-date statistics. With regard to state efforts to gain federal funding, we found that state

- ☑ *In some instances, California has lost federal funds because of its noncompliance with program guidelines or by not using funds while they are available.*
 - ☑ *The statewide hiring freeze and a pending 10 percent cut in personnel costs may further limit federal funds for staff.*
-

departments appear to use reasonable processes to identify new or expanded funding from federal grants and do not miss grant opportunities because of a lack of awareness.

Of the 36 grants for which the State's share fell below its total population share, 10 are due to California's low share of a particular demographic group. For example, California received relatively little of the federal funds awarded to rural communities for water and waste disposal systems in fiscal year 2001–02 because its rural population is low in relation to the rest of the nation. In addition, California is the country's sixth youngest state, so it received less than its total population share of grants to serve the elderly.

Funding formulas that do not allocate funds based on populations in need result in a lower percentage of grant funding for populous states such as California. Some grants are awarded based on old statistical data that no longer reflect the distribution of populations in need. For example, much of a grant for maternal and child health services is distributed according to states' 1983 share for earlier programs, for which California's share was 5.8 percent. If the entire grant were based on more current statistics, California's award for fiscal year 2001–02 would be \$23.6 million higher. Other grants provide minimum funding to states without regard to need; the State Homeland Security grant, for example, distributes more than 40 percent of its funds to states on an equal basis, with the rest matching population share. For this grant, the average per resident share for California will be \$4.75, far less than the \$7.14 average per U.S. resident.

We recommended that as federal grants are brought up for reauthorization, the Legislature, in conjunction with the California congressional delegation, may wish to petition Congress to revise grant formulas that use out-of-date statistics to determine the share of grants awarded to the states.

Legislative Action: Legislation passed.

In September 2003, the Legislature passed an Assembly Joint Resolution requesting that the California congressional delegation use the opportunities provided by this year's reauthorization of several federal formula grant programs to attempt to relieve the disparity between the amount of taxes California pays to the federal government and the amount the State receives in return in the form of federal formula grants and other federal expenditures.

Finding #2: State and local policies have limited California's share of federal funds in a few cases.

State and local policies limit California's share of federal funds for three programs. For the Special Education–Grants to States (Special Education) grant, California's share is less than would be expected based on its number of children because of the local approach to deeming children eligible for special education services. California's federal funding for the In-Home Supportive Services program is also low because of a state program that pays legally responsible relatives to be caregivers, a type of activity that is ineligible for federal reimbursement. Another agency has proposed changing the Access for Infants and Mothers and State Children's Health Insurance (Children's Insurance) programs to increase federal grant funding. These policies have affected the State's ability to maximize the receipt of federal funds. However, we did not review the effects on stakeholders that a change in government policies for these programs would entail, effects that may outweigh funding considerations.

The State's Residual In-Home Supportive Services program, funded solely from state and county sources, has likely reduced the participation of some eligible recipients in the federally supported Personal Care Services program. Both programs provide various services to eligible aged, blind, and disabled persons who are unable to remain safely at home without this type of assistance. The Residual In-Home Supportive Services program provides additional services and serves recipients who are not eligible for the federal program. In addition, the State's program allows legally responsible relatives to be caregivers to recipients. Legally responsible relatives include spouses and parents who have a legal obligation to meet the personal care needs of their family members. The federal program, in contrast, does not allow payments to such caregivers.

The Department of Health Services (Health Services), in conjunction with the Department of Social Services, may be able to apply for a waiver under the Medical Assistance program, called Medi-Cal in California. This recently developed waiver program, called Independence Plus, may allow states to claim federal reimbursement for a portion of the expenditures for caregiver services provided by family members. The departments estimate that the State may be able to save \$133 million of costs currently borne by the State's Residual In-Home Supportive Services program if this waiver is pursued. They indicated that they are jointly exploring the feasibility of this waiver.

We recommended that Health Services continue to work with the Department of Social Services to determine the feasibility of pursuing an Independence Plus waiver that may allow the State to claim federal reimbursement for a portion of the expenditures for caregiver services provided by legally responsible family members to participants in the In-Home Supportive Services program.

Health Services' Action: Pending.

Health Services says that due to the state budget crisis and lack of available staff to develop the new Independence Plus waiver, it has suspended efforts in this area. When it obtains additional resources to work on the waiver, it says it will resume working with the Department of Social Services to obtain federal approval.

Finding #3: California is not obtaining the maximum funding available from some federal grants, but to do so generally would require more state spending.

The State has lost some federal dollars because departments were unable to obtain the matching state dollars required by federal programs. For example, a Health Services program to recognize high-quality skilled nursing facilities would have received more federal grant money had state matching funds been available. For fiscal years 2001–02 and 2002–03, the federal government agreed to provide as much as \$16 million for the program. In fact, however, Health Services received only \$4 million in state funding for this program during fiscal year 2001–02, and it received no state funding for the program in fiscal year 2002–03 because of cuts in General Fund spending. Consequently, the State received \$12 million less in federal funding than it would have if it had spent the originally planned state match.

In addition, a reduction in state funding for several transportation-related funds may lead to the loss of federal funding for local projects. For example, the Los Angeles County Metropolitan Transportation Authority reported that if it could not replace traffic fund contributions, it risked losing \$490 million in federal funds for one project. In April 2003, it requested that this project replace other projects already earmarked for funding by another state transportation fund in order to secure the federal funding. The use of state matching dollars to maximize federal funds must, however, be balanced against the State's other priorities.

We recommended that the Legislature may wish to ask departments to provide information related to the impact of federal program funding when it considers cuts in General Fund appropriations.

Legislative Action: Unknown.

Finding #4: The State has lost and may continue to lose some federal funds because of an inability to obligate funds, federal sanctions, and budget constraints.

Over the last three fiscal years, agencies sometimes lost federal funds by failing to obligate funds within the grants' period of availability. In addition, noncompliance with program guidelines in four instances resulted in funding losses of more than \$758 million, mostly related to the lack of a statewide child support automation system. Finally, the statewide hiring freeze sometimes keeps agencies from spending available federal funding on grants staff, and a pending budget cut of 10 percent in personnel costs may further limit spending of federal funds.

Period of Availability

The most significant loss of federal funds resulting from a failure to obligate funds within a grant's period of availability relates to the Children's Insurance program grant, which is administered by the Managed Risk Medical Insurance Board (board). According to the board, over the last three years the State has forgone as much as \$1.45 billion in available federal funding because of a slow start-up and limited state matching funds. As a state initiating a new program, California's need to enroll clients led to a slow start-up of the Children's Insurance program and a resulting loss of federal funds, which primarily match a state's spending on insurance coverage for enrollees. According to a report by San Diego State University, administrative start-up costs made up a high proportion of total costs for states with new Children's Insurance programs, but the federal Children's Insurance program limits federal funding for these costs to 10 percent of total program costs. Thus, states with new programs had to bear most of the costs for outreach and other administrative expenditures during this phase.

California has not had enough qualified program expenditures to use its total annual allocations each year, but expenditures have been rising steadily. According to estimates by the board, reimbursable program expenditures will approximate its annual

allocations in the next few years. Thus, the board estimates that unspent grant funds that carry over from year to year, though still large, will decline, and reversions to the federal government will stop after October 2003.

Program Noncompliance

Noncompliance with program guidelines in four instances resulted in funding losses of more than \$758 million, mostly related to the lack of a statewide child support automation system. Since 1999, California has paid federal penalties for failing to implement a statewide child support automation system. Through July 2003, the total amount of federal penalties paid by the State amounted to nearly \$562 million. The estimated penalty payment for fiscal year 2003–04 is \$207 million.

As a step toward eliminating the penalties, the Legislature enacted Chapter 479, Statutes of 1999, providing guidelines for procuring, developing, implementing, and maintaining a single, statewide system to support all 58 counties and comply with all federal certification requirements. In June 2003, the Department of Child Support Services and the Franchise Tax Board, which is managing the project, submitted a proposal to the Legislature to enter into a contract with an information technology company to begin the first phase of project development in July 2003, with implementation in the 58 counties completed by September 2008. The total 10-year project cost is \$1.3 billion, of which \$801 million is for the contract. The federal government has conditionally approved the project, which is estimated to be eligible for 66 percent federal funding.

Hiring Freeze and Proposed 10 Percent Staff Reduction

In order to address the State's significant decline in revenues, Governor Gray Davis has undertaken several initiatives to reduce spending on personnel. These include a hiring freeze in effect since October 2001 and a 10 percent reduction in staffing proposed in April 2003. The hiring freeze already has had a negative effect on some federal programs, and the 10 percent reduction may affect them as well. After the October 2001 executive order, the Department of Finance (Finance) directed agencies, departments, and other state entities to enforce the hiring freeze. It also established a process for exempting some positions. The process includes explaining why a particular

position should be exempted and what the effect of not granting an exemption would be. Departments and their oversight agencies must approve the exemptions and then forward them to Finance for approval.

In response to our audit survey, staff at two departments said the hiring freeze and an inability to obtain exemptions had affected their federal programs negatively. In September 2002, the U.S. Centers for Disease Control and Prevention (CDC) wrote to Health Services noting vacant positions within the State's National Cancer Prevention and Control program and difficulties in filling vacancies due to the state-imposed hiring freeze as a major weakness. In a December 2002 letter of response to the CDC, Health Services indicated that it had filled some vacant positions, and in March 2003 Health Services sent exception requests for five federally funded positions to Finance, four of which Finance denied. As of June 2003, Health Services said that the CDC planned to reduce its grant for the 12 months ending June 30, 2004, to \$8.4 million from the \$10.6 million awarded for the nine months ending June 30, 2003. Health Services said an important element in the CDC's reduction was Health Services' inability to fill vacant federally funded positions.

Similarly, the U.S. Department of Agriculture (USDA) informed the Department of Education's (Education) Nutrition Services Division in September 2002 that through a management evaluation it had identified corrective actions in several areas where a lack or shortage of staff contributed to findings. It was concerned about staffing shortages in a unit responsible for conducting reviews and providing technical assistance to sponsoring institutions participating in the child nutrition programs. It warned that the USDA may withhold some or all of the federal funds allocated to Education if it determines that Education is seriously deficient in the administration of any program for which state administrative funds are provided. In May 2003, the State Superintendent of Public Instruction wrote to the Governor's Office asking for approval of a blanket freeze exemption allowing Education to fill all division vacancies, reestablish 12 division positions eliminated during the fiscal year 2002-03 reduction of positions, and exempt the division from a proposed 10 percent reduction in staff.

We recommended that Finance ensure that it considers the loss of federal funding before implementing personnel reductions related to departments' 10 percent reduction plans.

Finance Action: Partial corrective action taken.

Control Section 4.10 of the 2003 Budget Act, approved by Governor Gray Davis in August 2003, requires the Director of Finance to reduce departments' budgets by almost \$1.1 billion and abolish 16,000 positions. Finance states that it specifically omitted any federal funds from its August 2003 notice to the Legislature identifying the appropriations to be reduced in accordance with this section. It did this so that departments would not be required to reduce federal fund appropriations without full consideration of the effects.
